

CodeQuest:

A gentle welcome to writing code, using programming as a tool, and reframing big problems into small steps

All ages welcome: engage in hands-on instruction, independent projects, and office hours in a small classroom setting

Students will be walked through Git version control, HTML, CSS, JS, and jQuery while building their own websites, Chrome extensions, and Alexa skills. Additionally, students will practice problem solving, experimenting, and overcoming challenges in a coding context

\$99 for the entire course (20 hours, <\$5/hour)

M-T-W-Th-F, 8 am - 12 noon, or 6 pm - 10 pm

2310 E Oakland Ave #9, Bloomington, IL, 61701

First course: July 16th - July 20th

This course is taught by Vivek Bhookya, a computer science and astronomy student at the University of Illinois

Published work can be found by searching “Vivek Bhookya” in the Chrome Web Store, Amazon.com, and on Google Play
